/Thomas J. Cleary/
Patent Examiner, Art Unit 2111

Continuation of 10. Other (including any explanation in support of the above items): The summary of claimed subject matter refers to Paragraphs 46 and 47 as providing support for the limitations of Claims 1 and 9, but does not disclose where in the paragraphs support for each limitation can be found. The summary of claimed subject matter further refers to Figure 4 as providing support for the limitations of Claim 1, and Figures 2 and 4 as providing support for the limitations of Claim 9, but does not identify, by reference characters, which elements of the drawings correspond to the claim limitation. Further, the Examiner can find no support for the steps of "simultaneously rearranging threads in a single queue" and "ordering all requests from the hardware devices in the single queue" in the portions of the specification and drawings identified by Appellant. The summary of claimed subject matter further makes reference to each claimed step broadly, but does not identify where in the specification or drawings support can be found for the detailed limitations of each step. The grounds of rejection to be reviewed on appeal identify Claims 1, 3-6, 9-10, and 23 as rejected over Zolnowsky, Browning, and Jones, however, Claims 5-6 were not rejected under this ground of rejection. .
